# Carbon Black

## Recommended Products

In refineries and petrochemical plants, the need for high quality, dependable monolithics and brick is a constant. Because our roots have been in serving the refining and petrochemical industries for fifty years plus, we are able to offer these industries the specialty refractories to with stand extreme service conditions experienced in the carbon black processes.

Founded in 1946, Resco has served its markets with specialized products ever since, initially, with the refining industry and later in the steel industry. Innovations have been key to Resco's long success, including AA-22 and the original patent on semi-universal ladle brick.

Recent acquisitions have diversified Resco into many new refractory markets. The addition of Nationals product lines allows Resco to offer a comprehensive range of products, and dolomite products are available.
