## Recommended Products

Products for Hot Metal Cars			
Safety Lining	Brick	Monolithics	
	Seneca 60P	Rescoram A-45 HC	
Working Lining	Brick		Mortars
	Resin Bonded Alumina	Burned Alumina	Rescoset 80P
	Ladlemax BSC	Krial CFB	Adacor 70
			Adacor 80
Working Lining and/ or Maintenance	Shotcrete		
	Vibrocast 60 PC	QuikTurn 60PC	EZ Cubed 70 PC

EZ CUBED 70 PC

KRIAL CFB

LADLEMAX BSC

QUIKTURN 60PC

VIBROCAST 60PC

**LadleMax BSC** - a resin-bonded alumina carbon brick with silicon carbide designed for use in hot metal cars or iron charging ladles.

**Krial CFB** - a low iron, high strength 70% alumina brick designed for resistance to impact, abrasion and carbon monoxide (CO) attack in severe blast furnace and DRI applications.

**Vibrocast 60PC** - a 60% alumina, mullite-based shotcrete mix designed for minimum porosity and low linear change with maximum density and high fired strengths. This material will withstand severe high temperature corrosion and erosion environments.

**EZ3 70PC** - a 70% alumina shotcrete mix designed to give improved erosion, corrosion and refractoriness over Vibrocast 60PC.

**Quikturn 60PC** - a 60% alumina, mullite-based shotcrete material. After the initial set, the hot metal car can be returned to operation without curing or the traditional controlled heating schedule.
